

Equine Thumper

The Equine Thumper has the same design and features as the Thumper Maxi Pro Variable Power human Thumper, but is more powerful, and the best machine for athletes and people who want a deeper massage.

Designed for Horses

The Equine Thumper is the only massager for your horses, pets and livestock.

This is the Thumper model used by professional sports teams, and in professional equine training and competition

Equine Thumper works on all types of competing and resting horses

Thumper has been used with remarkable success on racehorses, hunter/jumpers, rodeo and reining horses. Dressage horses, 3-day eventers, show-jumpers, professional cutting horses, polo ponies, draft horses and chuck wagon teams.

Even if your horse is not an athlete, Thumper is great for horses that don't get enough exercise or those who just need some pampering.

Thumper is ideal for **horses in training or competition**, recovering from an injury and those who are nervous or "sour". Thumper **relieves muscle aches** and **relaxes** and improves the attitude of difficult horses.

The areas shown below are the first to break down on a horse during strenuous activity and are the root of most lameness problems. First to arrive in Canberra Proven to work and get deeper than any human hands.
